Seal off

Save
up

**When you act, you save \$100's a year.
Take these steps now to save heat and money.**

TURN DOWN. Set your thermostat 5° lower or install a programmable thermostat. Lower your hot water heater to no less than 115°.

SEAL OFF. Close heating vents in unused rooms. Make sure open vents are clean and unblocked by furniture. Install caulking around windows and weather-stripping around exterior doors.

SAVE UP. These small steps can save you more money. That, in turn, helps your heat go a lot further. And we can provide financial assistance to those who qualify.

For more tips, financial aid and resources on staying warm and saving up, visit TurnSealSave.org or call 1-866-550-4355.
